SELECTED PROJECTS

Season Enterprises — Nepali Handicraft E-Commerce Platform

React · TypeScript · Tailwind CSS · Node.js · Express.js

- Developed a full-stack e-commerce platform for selling Nepali handicraft products.
- Built the platform as a practical digital solution for my grandfather's handicraft business.
- Developed both frontend and backend components of the application.
- Created a user-focused interface for showcasing Nepali handicraft products.

[GitHub Repository](#)

NepaliKala — Nepali Handmade Products Platform

Python · Django · HTML · CSS

- Developed a Django-based web application for showcasing and selling Nepali handmade products.
- Built the project as part of a college academic project.
- Worked with Django's application structure, templates, static files, and media handling.
- Focused on creating a platform that promotes locally made Nepali products.

[GitHub Repository](#)

Doctor Appointment System

HTML · CSS · JavaScript

- Developed a web-based platform for managing doctor appointment activities.
- Implemented user registration and login interfaces.
- Created appointment-related pages and dashboard interfaces.
- Built a structured and responsive interface for users interacting with the appointment system.
